

I and my medical experience is a good example of how the patients are exploited and the so called corporate hospitals & some medical doctors are playing with the lives of the patients. I had severe pain in the Knee Joints I approached a good doctor in a reputed hospital in Hyderabad. I was diagnosed with Osteo Arthritis and gave me painkillers and I used for almost a year without any relief from my problems.

A friend of mine who took Treatment for Spondylosis with Dr Kranthi Vardhan and Dr Madhuri Vardhan at The Kerala Ayurvedic Care, Speciality Panchakarma Centre and was cured by 95% referred me. The doctors listened all the history and immediately diagnosed my problem to be **GONOCOCCAL ARTHRITIS** for which I took Speciality Panchakarma External Therapies for a period of 21 days and research medicine for a period of 5 months. After a period of six months all my blood reports are found to be normal. I am indebted to both the doctors for their apt Diagnosis and Treatment. I wish them all the very best.
