

I Srinivasan T. S am a native of Madras, my son works here in Hyderabad in Tata Indicom Limited as a Senior Manager. I had come to see my son for a vacation to Hyderabad. During which, one day I saw an advertisement in Deccan Chronicle News Paper about the Back Pain and the Ayurvedic Specialties' of curing it. I called Dr Kranthi Vardhan took an appointment and came and met him on 9th July 2004.

Let me tell u all my medical history...I am 65-year-old man with severe backache, weakness, numbness, and muscle wasting in my both the lower limbs, unable to walk without support since 4 years, I have noticed constipation and bladder disturbances like urinary urgency and urine retention from the past 6months, I also had Angina Pectoris 6 years back for which I am on medication.

My Contrast MRI in Dec, 2003 reveals Intramedullary lesion in the lower part of cord and conus with expansion mild patchy enhancement. Radiological possibilities include **INTRAMEDULLARY TUMOUR AND DEMYELINATION**. And my MRI tells that Intramedullary lesion in the lower dorsal cord and conus with mild enlargement possibly SOL /? DEMYELINATION. I had thus undergone many other tests like Nerve Conduction Study, 2D Echo, and Ultrasound Abdomen in Apollo Hospitals, Madras. After these tests the specialists advised me to take Vitamin E tabs and other medicines that I have been taking all these years and advised me that I should have to live with the disease.

With all these data I went to Dr Kranthi Vardhan's The Kerala Ayurvedic Care, Speciality Panchakarma Centre, Basheerbagh, Hyderabad. He listened in detail about my condition and finally told me to give a time of 4 weeks for a Panchakarma Procedure. He assured me that I will be okay minimum by 70% in 3-6 months of time. I underwent the procedure, from 3rd week itself I have slowly started to improve and in the next 2 months I have almost improved 90%. I was hopeful of getting back to normalcy in 6 months. I after 6 months was very normal and am enjoying the best of my life. I went back to Apollo Specialist one day with a latest MRI done. The doctor was surprised to see the changes in my MRI.

I am very happy to give my Testimonial. I pledge all the people who lost hope in Allopathic Treatments and their side effects to shift to AYURVEDIC Science for a better cure, which I knew personally after taking treatment. May all the success be with him! I Thank Dr Kranthi Vardhan and his excellent and dedicated team of

Therapists who have showed the world that Ayurveda and Ayurveda Panchakarma does miracles. Thank you and God bless you all.

Srinivasan T.S.
Retd Advocate, Madras.
