

I Was Confirmed To Have **MULTIPLE KIDNEY STONES** the maximum size being 24mm, due to which I used to get severe pain and had difficulty in passing urine. I used to get bloody urine sometimes. I was scared and showed myself to many Urologists in Miryalaguda, Nalgonda and at Hyderabad, all of them wanted to do a surgery, which they call it, a minor operation.

I was really scared and wanted to avoid surgery, by the advice of one of my relative I came and met Dr Kranthi Vardhan who gave me assurance and some special researched medicine was started immediately. The course was for 3 months I had to follow some specifications like drinking more water and avoiding some foods, alcohol etc. As a result of the treatments, I have no more *kidney stones*, as confirmed by my ultrasound abdomen on 18th July, 2007 after a period of almost three and half months after the first ultrasound. I am overjoyed after the report. Thank you Doctor and May God bless you.

Lingaiah, Teacher,

Miryalaguda, Nalgonda.
