

I am Susheela aged 51 years am married with two children. All these years I have been looking after my husband and my children with much care and concern. I was an active lady and never used to be idle or unhealthy. All my problems started from the past 5 years where I was getting irritated very easily, inactiveness has increased, sleep deprivation was haunting, used to feel feverish, was putting on lots of weight and my bouts of anger multiplied and lost interest in everything.

We are strong believers of Ayurveda and used only Ayurvedic medicines since my childhood. We met Doctors couple at The Kerala Ayurvedic Care, Basheerbagh, Hyderabad and after examination Dr Madhuri told us that it was all natural, nothing to get worried or annoyed of it and it was not a disease. It's all related to my **MENOPAUSE**. After taking Rasayana & Rejuvenation Therapies, using researched medicine I am comfortable now and am able to perform all my activities with ease. Thanks to the doctor's couple and their team for getting back smiles on our faces. I also thank my husband and my children for their care, concern and support.

**Susheela, Housewife,  
Boggulakunta, Hyderabad.
