

I thank Dr Madhuri Vardhan for treating my **MENSTRUL PROBLE**. I am 19 years old suffering with excessive bleeding from the past 2 years. I have consulted many doctors; they kept me on hormones for almost 2 years in a row. Everything seems to be all right when I am on the hormones, the moment I stopped them, there used to be a problem. I was in a situation vexed up and was looking to have peace from all these problems. I ended up in anemia and breathing problems followed it and was losing weight on a continuous basis.

I came to know about Dr Madhuri Vardhan from a TV interview In MAATV where she gave a link to period problems, anemia and the Breathing Problems etc. I liked the interview and met her and immediately started Ayurvedic medicines. First my breathing problems are gone then my anemia and finally now after 6 months even my periods are normal and have also gained weight. I thank Dr Madhuri Vardhan for giving me a new life.
