

My mother aged 58 years, a housewife has been a patient since 1 year of **MOTOR NEURON DISEASE**, complaining of weakness in her left leg increasing day after day, after about two months the other leg too got weak followed by the left hand after about one and half months. She was at first able to walk with the help of a walker and after a few months with this disease she slowly restricted herself to the cot. We have visited many neurologists who said that there is no cure for this disease except to live with it.

With the advice of one of the Neurologists, we met Dr Kranthi Vardhan at KAC and have registered with him for a Panchakarma Therapy for 6 weeks after which she is able to find some strength & good improvement in her legs and hands. She is now able to grip the things and her confidence level has also fortified. The disease hasn't progressed after the treatment and we are happy to have gone to Ayurveda. We wish them good luck for their Research and pray for their success in finding solutions for all these kinds of problems

I am Hari Narayan on Behalf of my Mother Shailaja.

Housewife, Madanapalli.
