

It's so rare in medicine, to find two doctors, who are both clinical experts in their fields, and have a tremendous amount of gentleness and compassion with their patients. I have never met two Ayurvedic Specialists like Dr. Madhuri Vardhan and Dr. Kranthi Vardhan. Their skill levels and empathy exceed most others. This doctor couple has been a vital part of our success, with conceiving and maintaining our pregnancy.

It was a long stretch of disappointments, surgeries, test after test, cycle after cycle, consult after consult; almost 4 ½ years of struggle. We have come to know about these doctors by a renowned Infertility specialist in Chennai who referred us to them. We met them, they are really great people, after consultation they diagnosed us as a case of **PRIMARY INFERTILITY** and the internal medicines were started for both my husband and myself. The doctors analyzed our body constitution and prescribed specific dietary and Life Style changes and were asked to take the medicines for 3-6 months continuously.

I got conceived in the second month itself and we have been blessed with one beautiful daughter. Dr. Madhuri Vardhan and Dr. Kranthi Vardhan have never let us give up hope throughout our stressful experience. We owe so much of our joy and happiness to this amazing team. We are so very grateful for their expertise and devotion in the field of Infertility and Sexual Medicine.
