

My mother Mani, 58 years came to ban galore to stay with me in Dec 2007. She was healthy for about a month. In Feb. 2008 my mother suffered with severe neck pain, pains, numbness, weakness, and tingling sensation in the left side of head, neck, shoulder joint, arms and hand. She had giddiness, reeling sensation and even vomiting. Doctors in NIMHANS, Ban galore diagnosed my mother's condition as **VERTIGO WITH CERVICAL SPONDYLOSIS** of C5-C6, C6-C7 Vertebrae with mild disc bulge in these areas. She used medicines for 3 months but had only little relief in her condition. She underwent physiotherapy for almost two and half months with only meager improvement in her condition. She got depressed and frustrated with her condition.

She forced me to take her to Hyderabad, as she wanted to meet Dr Kranthi Vardhan and get his advise about her. We knew the doctor since 5 years; we took our brother who had severe back pain and was cured of his problem in only 4 weeks of treatment at KAC in 2003. After a consultation doctor asked us to have external therapies for 28 days with research internal medicines for 6 months. From April onwards she is in the pink of her health and has improved by 95%. We thank Dr Kranthi and his energetic and hardworking team for curing our sufferings. Thank you.

**Raghuram for My Mother Mani,
Chikkadpally, Hyderabad.
04-05-2008.**
